

Press Release

New Motors Silent Gliss 9090 & 9091 for systems Silent Gliss 2650 & 2950

The new motors Silent Gliss 9090 and 9091 with integrated receiver are now available for our most innovative Folding Panel System 2650 as well as for our Vertical Blind System 2950. The further developed motors offer silent and very precise operation, electronic end-stops and sleek design.

Furthermore, with the introduction of these motors, both systems Silent Gliss 2650 and 2950 are now very flexible in their applications and can be fully integrated in all kind of building management systems due to the open architecture of the new motors. This makes those systems well suited for the contract as well as for the retail market.

Comfortable operation from anywhere in the room is possible through our Radio Remote Control System Silent Gliss 9940 (only applicable with motor Silent Gliss 9091).
